Answers to question in Module 3 for cs2113
William Horowitz

Exercise 3.1
Yes, two pointer can point to the same thing (as demonstrated by intPtr and intPtr2 pointing to the variable i.

Exercise 3.4

Adr:1000 B[0][0]   data
Adr:1001 B[0][1]   data
                          . . .
Adr:1002-1399   B[0][2]-B[19][18]

Adr:1400 B[19][19]   data

Allocated as 1
continuous block

B2   1200   Pointer to array of
                      pointers to arrays

1200   1451   Array of pointers
          1555   to 20 other arrays.
1220   ....   Those arrays hold
                      the actual data

1451   Data for B2[0]
          [0]-B2[0][19]
1471
